## Installation

It may happen that you will see a message like this one the first time you open Run Monitor:

"Run Monitor" can't be opened because Apple cannot check it for malicious software.

In order to solve it, follow 3 simple steps:

1. Press on "Show in Finder"
2. Secondary click in Run Monitor and select "Open"
3. Same message will appear but now there will be an option to open the program

This is a **one-time problem**. Once you open the program, you will not have to do it again.
